## Àltima's purpose

From our everyday contact with the death experience, we strive to help everyone to deal with death more naturally and less fearfully in order to accept it for what it is: **a part of life.**

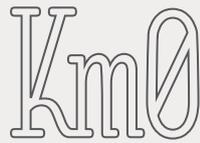

### **ACCOMPANYING FAMILIES**

Furthering our excellence,  
humanity and empathy in the  
accompaniment of families.

### **ENVIRONMENT**

Guaranteeing mindful environmental  
management of all our resources.

### **PROXIMITY**

Favouring proximity with all members of  
society, including customers, suppliers and  
the community in general.

### **GOVERNANCE**

Ensuring transparent and  
responsible management at all levels.

### **PROFESSIONAL STAFF**

Motivating and supporting opportunities  
for personal and professional advancement  
of all our employees.

Four points of corporate focus:  
people, innovation, technology and sustainability.

## PEOPLE

We put people at the centre of everything we do.

In our relations with **customers** who hire our services, we promote excellence, humanity and empathy in the accompaniment of families.

The talent and involvement of our **staff** and **collaborators** are key to achieving results. We promote the development of these skills through ongoing training and by maintaining a healthy and equality-based workplace environment in which opportunities for growth are available to all. We protect the well-being of our staff through initiatives such as refurbishing and improving rest areas and offering health insurance with significant advantages.

### Key relevant actions taken by Àltima in this regard in 2023:

# 7,157

TOTAL HOURS OF TRAINING

# 998

TOTAL NUMBER OF TRAINEES

# 456

TOTAL NUMBER OF PROFESSIONALS (46% WOMEN)

# 99

NEW HIRINGS (58.58% WOMEN)

# 10

PROMOTIONS (40% WOMEN)

# INNOVATION

We encourage creativity and innovation as ways of contributing value to our users and collaborators.

The constant search for solutions is the way to meet the needs and demands of our users and collaborators, such as insurers, city councils, agencies, hospitals, nursing homes, etc.

Innovation is present in all aspects of our activity. From the design and development of our products and services to the way in which we treat families and our associates.

## Aromatic commemorative bouquet

**New concept of ecological** and aromatic commemoration in the form of a bouquet. Small bouquet of lavender with a ribbon commemorating the deceased. Placed on wicker trays to be handed out in viewing rooms or at prayer room entrances.

## Planta Viva

In 2023, as part of our commitment to sustainability, **we managed to avoid the use of over 100,000 cut flowers** due to the **Planta Viva (Living Plants)** project, which substitutes cut flowers in floral arrangements with flower pots containing tasteful arrangements of seasonal species that are harvested locally.

## Open-air services

The **Àltima Gran Via Funeral Parlour-Crematorium** has new areas for open-air ceremonies with music and catering. This service was already available at the Àltima Ronda de Dalt Funeral Parlour and shall be offered at the Àltima Sitges Funeral Parlour-Crematorium later this year.

## A different All Saints' Day

In addition to the traditional All Saints' Day commemorative ceremony with live music, we organised activities at the Roques Blanques regional cemetery for families who visited us, including an area for having tea, a chestnut stand and contemporary dance performances.

## Body repatriation

In order to offer personalised services that meet the needs of each family, we created in 2023 a new department that handles body-repatriation services.

## Bizum

Payment through Bizum was enabled in order to provide families with a new option for payment of services.

## NEW AREAS

At Àltima, we work tirelessly to improve areas and to search for new facilities in order to offer a more complete service.

At Àltima, we are continuously expanding and enhancing our areas to meet the needs of our users and collaborators. Every new facility is designed with the latest technology and maximum sustainability to ensure that the areas are respectful of families and the environment.

### Refurbishment of Àltima Figueres Funeral Parlour

Full-scale refurbishment of the funeral parlour to provide it with an image of greater proximity and warmth, with a new image of the façade, bigger viewing rooms, natural lighting and better areas for families.

### New staff areas

For Àltima, the well-being of our employees is a priority. To this end, we reformed in 2023 parts of the onsite areas reserved for staff. Examples of this are the refurbishment of the break rooms at Manresa and Roques Blanques regional cemetery and the full-scale refurbishment of the new central services offices, which also feature a new system for climate control and air renewal and a new lighting system. These measures are also examples of our commitment to sustainability.

### New office in Tarragona

We expanded our services in Tarragona with a new family-service office. The new office provides all services to funeral parlours in the city and the province.

### New areas for cremains

At the Les Pruelles cemetery in Sitges, we established a new ecological and sustainable area for cremains. The area features a space for almond trees with capacity for interment of up to five urns beneath a tree that is native to the Mediterranean, as well as a new perinatal area and a new area for cremains dedicated to perinatal, neonatal and gestational mourning.

In addition, at the Vilanova cemetery, we built a new area for gestational, neonatal and perinatal mourning.

Lastly, at the Roques Blanques regional cemetery, we expanded the areas for ecological cremains: Forest Path and Family Trees.

# SUSTAINABILITY

Every decision we take is guided by our concerns regarding the impact of our actions on the environment and on society.

Our company is sustainable, responsible and committed to the environment and to the use of local products. We adopt practices that allow us to reduce our consumption of natural resources and to minimise our carbon footprint.

## Solar panels

In 2023 and early 2024, we completed the installation of over 1,600m<sup>2</sup> of solar panels at 13 of our funeral parlours. This has reduced our consumption of electricity and prevented the emission of over 504 tonnes of CO<sub>2</sub> per year, which amounts to the equivalent of having planted over 65,500 trees.

With this eco-friendly, self-supplying power system, we have generated over 1,103,487 kWh of green energy. The entire installation project is part of our corporate commitment to sustainability, which is an area on which our company's strategy is wholly focused.

These kinds of initiatives help to reduce our carbon footprint, which we have monitored for years, in order to take action in response to the climate crisis with greater efficiency, designing real strategies that favourably affect human health and our surroundings.

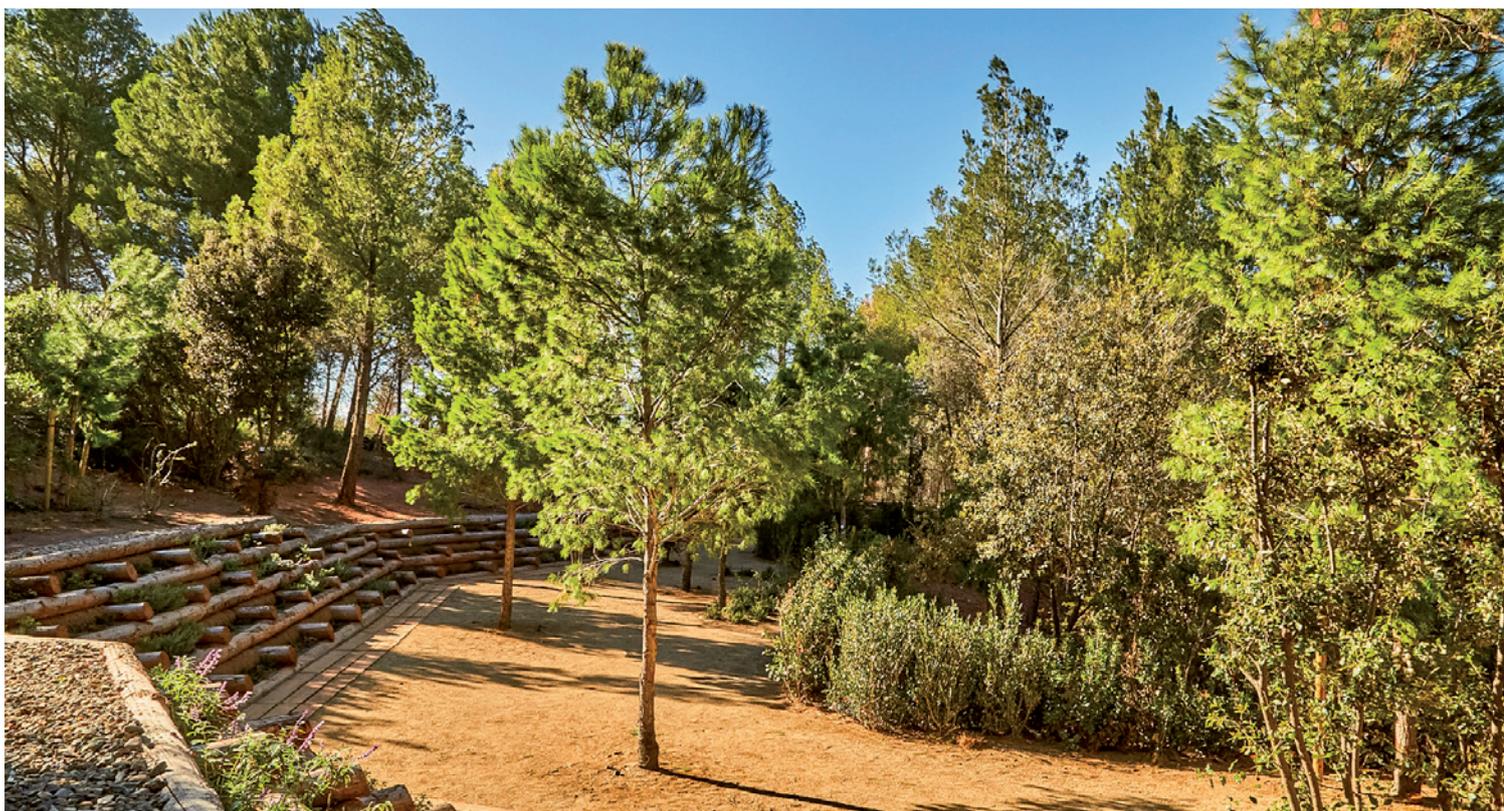

We have installed solar panels at the following funeral parlours:

- Àltima Vilafranca del Penedès Funeral Parlour (Alt Penedès)**
- Àltima Gavà Funeral Parlour-Crematorium (Baix Llobregat)**
- Àltima Ronda de Dalt Funeral Parlour (Barcelona)**
- Àltima Sitges Funeral Parlour-Crematorium (Garraf)**
- Àltima Sant Andreu-Nou Barris Funeral Parlour (Barcelona)**
- Àltima Figueres Funeral Parlour-Crematorium (Alt Empordà)**
- Àltima Sant Just Desvern Funeral Parlour (Baix Llobregat)**
- Àltima Sant Vicenç de Castellet Funeral Parlour (Bages)**
- Àltima Alt Camp Funeral Parlour (Alt Camp)**
- Àltima Sant Feliu de Guíxols Funeral Parlour-Crematorium (Girona)**
- Àltima Terrassa Funeral Parlour-Crematorium (Barcelona)**
- Àltima Gironès Funeral Parlour-Crematorium (Girona)**
- Serveis Funeraris Inca Funeral Parlour (Mallorca)**

### Electric vehicles

In 2023, we replaced 11 conventional vehicles with electric vehicles, which, including those already existing in our fleet, now total 65 low-emission cars.

VEHICLE TYPE	UNITS
Conventional	114
<b>Electric</b>	<b>63</b>
<b>Hybrid</b>	<b>2</b>
Overall total	179

### EV chargers

We expanded our network of EV chargers at the parking lots of our funeral parlours with 16 new chargers installed in 2023.

### Energy management software

At over 90% of our centres, we have installed a programme that controls, meters and monitors electricity consumption, making them more efficient and reducing consumption.

### Lighting

At the Vilafranca funeral parlour, lighting was upgraded with LED light bulbs in viewing rooms and in the lobby as a means of improving efficiency and reducing consumption of electricity.

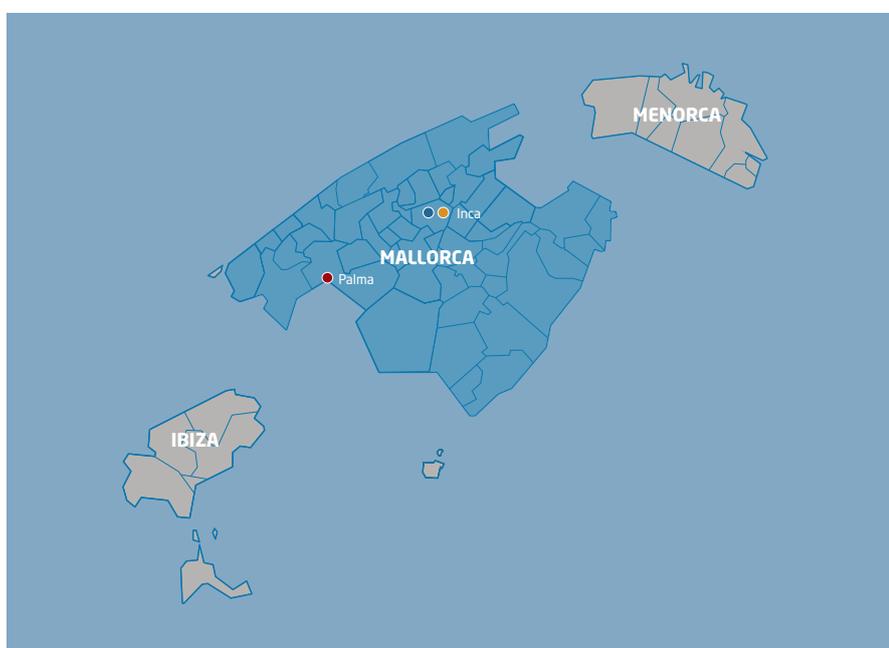

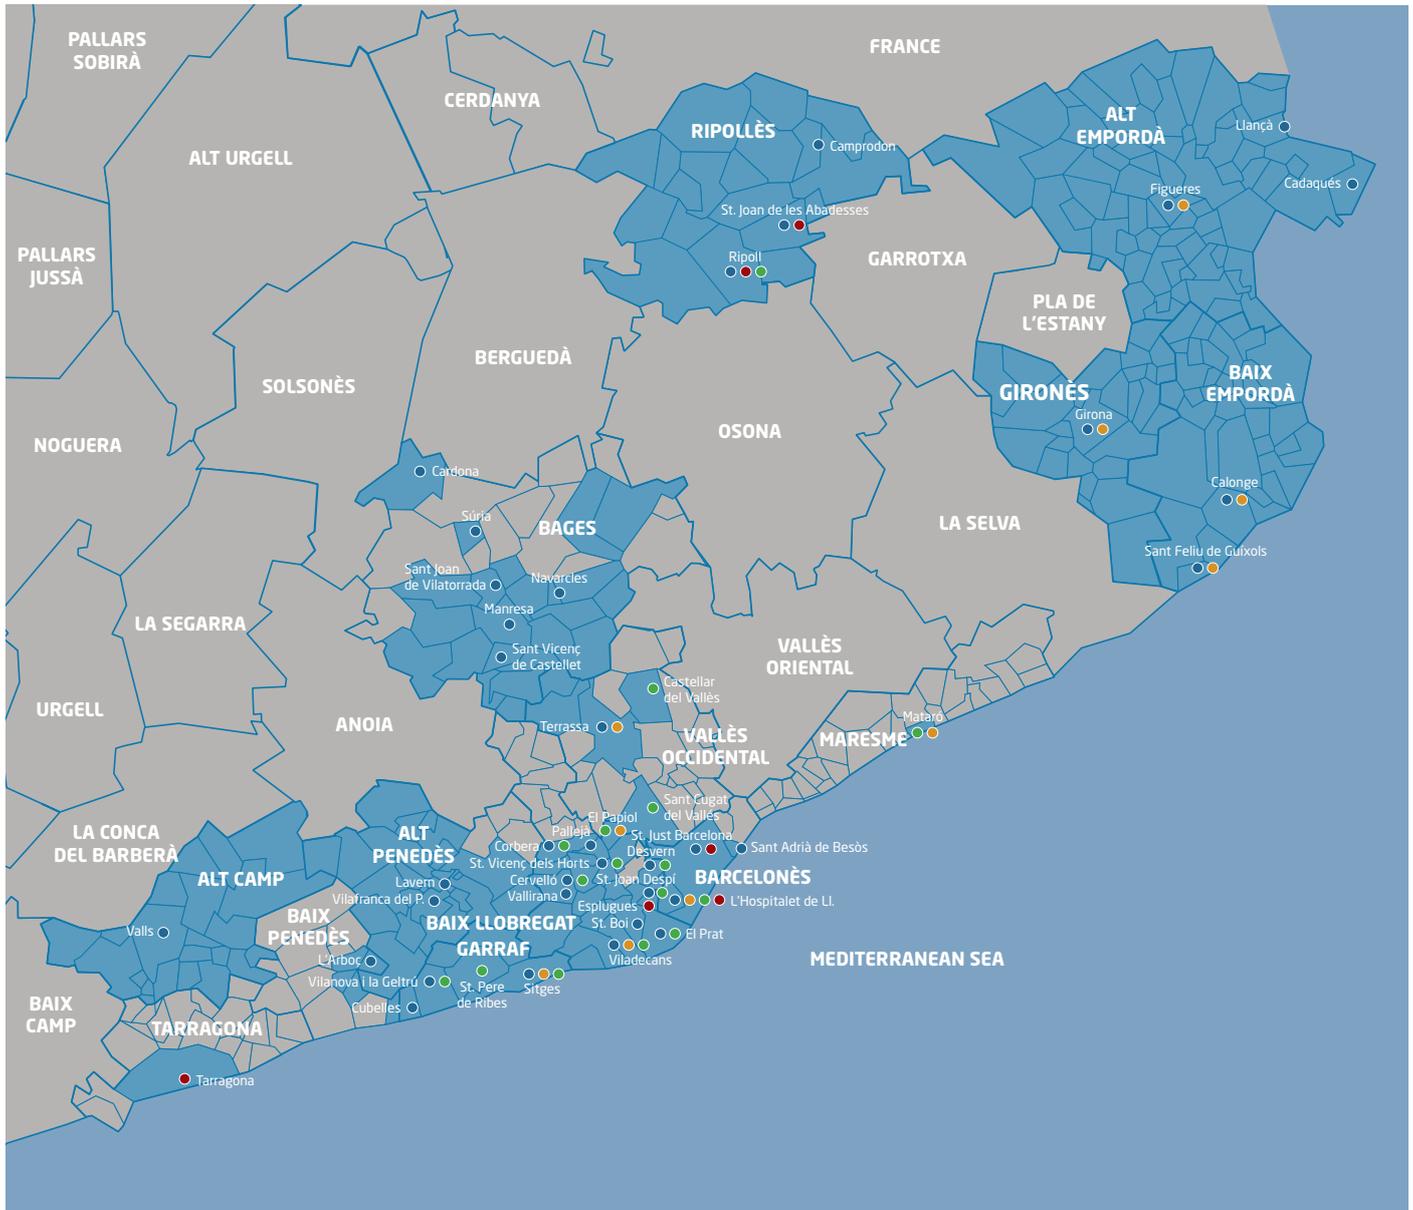

### Irrigation

At the Roques Blanques regional cemetery, we completed the installation of two kilometres of optic fibre and 1.8 kilometres of high-speed data cable. The installation controls 49 PLCs that ensure sustainable management of the irrigation required in each area and the consumption of water and detects any problems in the facilities.

At the Les Pruelles cemetery in Sitges, we replaced the entire irrigation system in order to prevent leaks, solenoid failures, ruptured pipes, etc.
